

**PROGRAMME OUTCOME
OF
SUSTAINABLE DEVELOPMENT**

**SEMESTER : 2nd
Academic Session : 2023-24**

After completion of the course , the learners will be able to :

PSO 1 : Gain foundational knowledge of sustainable development, including its themes, principles, and frameworks such as the Brundtland Report and Sustainable Development Goals (SDGs).

PSO 2 : Develop an understanding of ecosystems, biodiversity, and their sustainable use, emphasizing ecological balance and the importance of conservation.

PSO 3 : Apply multidisciplinary approaches to address challenges related to industrialization, urbanization, and biodiversity depletion, promoting sustainable solutions.

PSO 4 : Utilize knowledge from ecology, economics, and social sciences to contribute to sustainable development initiatives.

PSO 5 : Foster an ethical mindset for biodiversity conservation and sustainable resource management, emphasizing long-term ecological and human well-being.

PSO 6 : Engage in real-world scenarios such as ecotourism and biodiversity conservation projects, bridging theoretical knowledge with practical implementation.

PSO 7 : Gain in depth knowledge of the evolution from Millennium development goals (MDGs) and their relevance in Agenda 2030.

PSO 8 : Understand and contribute to Green movements , green building practices and renewable resource Management.

PSO 9 : To lead initiative within public and private sectors to achieve sustainability goals effectively.
